

OTTO ARC SYSTEMS, INC.

SINCE 1988

2015 PRODUCT CATALOG

ORBITAL WELDING / BEVELING / FACING / ACCESSORIES

INTRODUCTION

Otto Arc Systems, Inc., formerly Otto Tool, has been in business for over 27 yrs. We have provided Beveling and Facing Equipment since the day we opened our doors and have been expanding our product lines ever since. Over the last three years we have added numerous lines of products to help assist with your project requirements.

Our high performance line of Orbital Welding products include Mechanized and Robotic Systems that can also be customized per project if needed. We recently added our exclusive QC-4000 Tube and Pipe Saw and have also enhanced a few of our TSM Facing models.

This year our new catalogs will present to you how our company has grown over the years and the wide array of products we have to offer. Along with this current product catalog we have added two more catalogs showing our auxiliary welding product line and automated piping systems. At Otto Arc we are always making sure our clients are well taken care of - that is our first priority.

We are always attentive to new market trends and believe that feedback from our customers has placed our company on the map. We assist our clients by listening to their needs and then delivering to them the best options, service and products available for their business. Thank you for your time and consideration; please do not hesitate to contact us with any questions you may have.

Sincerely,

Alan Avis

President, Otto Arc Systems, Inc.

TABLE OF CONTENTS

ORBITAL WELDING PRODUCTS	
Power Supply Units	1-3
Tube and Pipe Weld Heads	4-10
Tube to Tube Sheet Weld Heads	11-15
Custom Manufactured Products	16 - 18
Aftermarket Weld Heads / Accessories	19-20
BEVELING PRODUCTS	
Beveling Machines (ID Mount)	21-26
TUBE CUTTING SAW / ACCESSORIES	
Tube Cutting Saw	27
Saw Guides / Saw Blades	28
FACING PRODUCTS	
Facing Machines (OD Mount)	29-34
Optional Tool Bits / Collets	35

OW-ARC 180 (Power Unit)

The OW-ARC 180 welding power supply provides digital control of the weld current and electrode travel speed; producing consistent and repeatable weld results. The OW-ARC 180 features a touch-screen display for easy navigation and data input. To access menus and input weld data, the operator presses the touch screen over the selection. Weld programming is easily accomplished using the built in auto programming feature.

PERFORMANCE

- Windows CE operating system
- Up to 20 levels for each program for accurate welding control
- Internal memory can store 200 welding programs
- · USB port for importing and exporting data
- Controls for welding current, travel/wire speed
- Remote pendant
- · Fault detection and message display for easy maintenance
- Integrated printer / offline printing
- Welding heads available for a wide range of welding applications
- · Large Cooling system
- Solid metal case for convenient transport
- Auto select 120/240 VAC
- Real time data collection with printout
- Auto print weld summary option
- Burn through protection prevents weld head damage
- · Start, stop, downslope, home and set home from weld head

OW-ARC 250 (Power Unit with AVC and OSC)

The OW-ARC 250 uses an intelligent PC basedcontrol system with digital signal processing and high resolution monitoring for every output and sampling signal. It also contains a windows CE embedded version operating system and simple operating interface for accurate welding. Also includes off-line programming and off-line printing function.

PERFORMANCE

- Up to 20 levels for each program for accurate welding control
- · Internal memory can store 100 welding programs
- USB support for importing and exporting data
- · Controls for welding current, travel/wire speed and gas
- · Control pendant display for real-time weld monitoring
- · Welding distance can be set according to time or degree
- Arc voltage tracking control for peak and/or base values or simultaneous values
- · Oscillation edge lock function
- · Memory function for welding parameter changes made during weld
- · Fault detection and message display for easy maintenance
- Pulse rotation and pulse wire feeding function
- · Wire feeding ON/OFF during the welding process
- Current, rotation/wire feed speed, oscillation width, speed, center position and arc voltage are adjustable during the welding process
- Data transfer between the same series power source by USB driver
- Option to choose offline programming and printing with USB support
- Welding heads available for autogenous (fusion) / wire feed applications
- Multi-axis function display
- · Integrated water cooling system/Internal printer to print data
- · Solid metal case for convenient transport

OW-ARC 400 (Power Unit)

The OW-ARC 400 digital GTAW (TIG) welding power source consists of an inverter power supply, remote control pendant, integrated water cooling system and gas bottle rack on a portable chassis. The system utilizes a state-of-the-art PC controller and is designed for medium to thick wall pipe and tubing. It offers easy programming and versatility to tackle the most demanding piping applications for power generation, petrochemical, marine and aerospace industries.

Remote Pendant Control Unit

PERFORMANCE

- · Windows CE embedded version operating system
- Up to 20 levels of parameter control (sector/levels) per welding program
- Stores 100 welding programs in internal memory
- Parameter controls for welding current, travel speed, wire speed, shielding gas and AVC / OSC control
- Arc voltage tracking control for peak and or base value tracking or simultaneous tracking
- Welding heads available for autogenous (fusion) / wire feed applications
- · Control pendant display for real-time weld monitoring
- Oscillation controls width, speed and center position are adjustable during the welding process
- · High frequency or touch start arc ignition
- · Built in integrated water cooling system
- Comprehensive fault detection and message display for easy maintenance
- Option to choose offline programming with offline printing

TPWH-C SERIES (Closed Weld Head for Tube and Pipe)

The TPWH-C series is designed to perform orbital TIG welds on tube and thin wall pipe without the need for wire feeding. The sealed cavity is filled with protective gas prior to and during the welding process. This weld head is very efficient and has a water cooled system. Various collet sizes are available, offering accurate positoning without tacking.

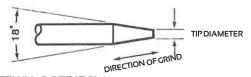

- · Closed chamber for better gas coverage and cleaner welds
- Compact design for small work areas
- Commonly used for stainless steel, nickel alloys and titanium
- Water cooled head for high production and larger wall thickness
- The tool of choice for medical, food, biological, electric, instrument and pipe installation industries
- Recommended Power Unit = OW-ARC 180

TC-ARC (AMI) Closed Weld Head (1", 2" and 4")

Plugs directly into AMI Power Sources, no cable adapter needed. Optional adapter available for AMI collets, easy clamping system. *Note: This weld head is specifically designed for AMI equipment.*

PERFORMANCE

- Plugs directly into AMI Power Unit
- · No cable adapter needed
- Easy clamping system for adjusting and tightening collets
- Size range is 1/4" to 4"
- Various sized collets available
- Optional adapter available if using AMI collets (see page 42)
- Optional 1" head holder available
- · Heavy duty, more robust design
- Water cooled

TPWH-O SERIES (Open Weld Head for Tube and Pipe)

The TPWH-O Series is designed for TIG welding on tube to tube, pipe to pipe and pipe fittings and is suitable for carbon and stainless steel. The TPWH-O Series is used for applications that do not require AVC/OSC. Welds tubing and pipe for industries such as chemical, food, medicine, boilers, military and nuclear industries.

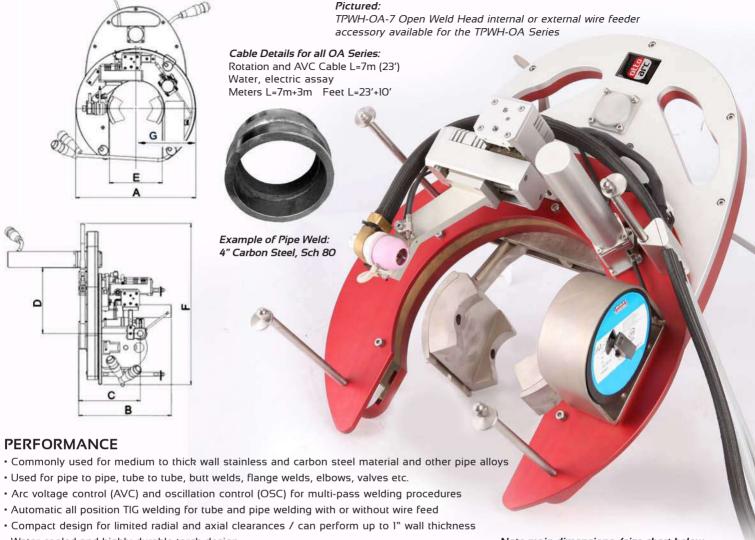

- Suitable for thin wall stainless steel, carbon steel and other common alloys
- Capable of welding 4mm (.158") wall thickness
- Used for tube to tube, tube to flange, tube to elbow and tube to valve etc.
- · Automatic all position TIG welding for tube to tube welding with or without wire feed
- Water cooled and highly durable torch design
- Mechanical tracking ensures consistent torch height control
- · Recommended Power Unit = OW-ARC 180

TPWH-OA SERIES (Open Weld Head with AVC and OSC for Tube and Pipe)

The TPWH-OA Series is designed for TIG welding on tube to tube, pipe to pipe and pipe fittings and is suitable for carbon and stainless steel. The TPWH-OA Series is used for applications that require AVC/OSC. Welds tubing and pipe for industries such as chemical, food, medicine, boilers, military and nuclear industries.

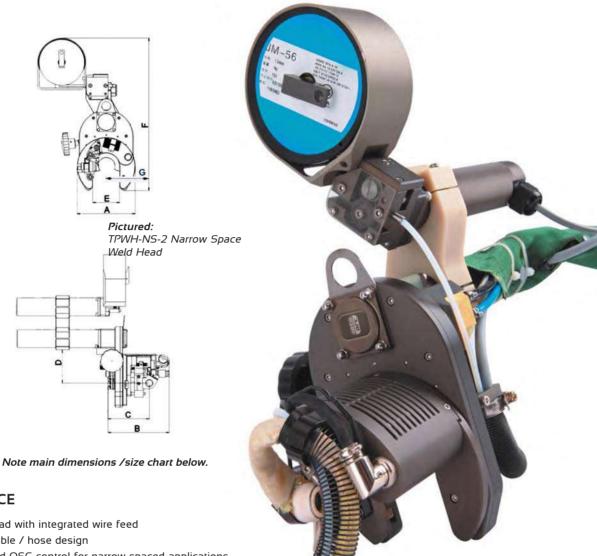

- Water cooled and highly durable torch design
- Recommended Power Unit = OW-ARC 250 and 400

TPWH-NS-2 (Narrow Space Weld head for Tube and Pipe)

The TPWH-NS-2 is designed for tube to "U" shape (return bends) TIG welding suitable for carbon and stainless steel tube to tube connections and is used mainly for applications that require wire feeds or autogenous welding. This product also includes an integrated wire feeder with AVC & OSC controls.

- Orbital welding head with integrated wire feed
- Unique no twist cable / hose design
- Motorized AVC and OSC control for narrow spaced applications
- · Quick clamping and accurate centering ensure repeatability
- Special design for return bends, "S" bends and other reduced clearance applications
- Recommended Power Unit = OW-ARC 250 or 400

PWH-LD TIG (Large Diameter for Medium/Heavy Wall Pipe)

- TIG orbital welding system for medium and heavy wall pipe
- Track mounted welding head with single/dual wire feed
- Optional with hot wire TIG welding power source and hot wire TIG wire feeder for greater performance
- Welds large diameter and thick wall stainless steel pipe welding with standard J or compound preps
- Standard "V" prep on carbon steel only
- Recommended Power Unit = OW-ARC 250 or 400

TSWH-1.5 (Tube to Tube Sheet Weld Head)

Designed for TIG welds for tube to tube sheet carbon and stainless steel. Mainly used for flush tube connections that require no wire feed.

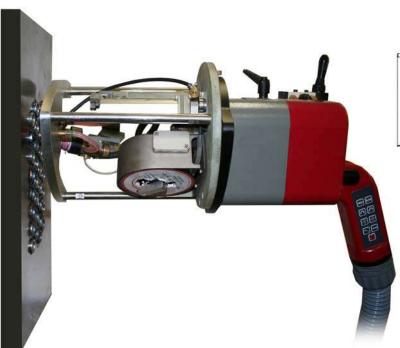

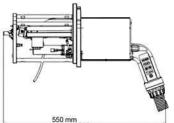

- Tube to tube sheet welding without filler wire
- Commonly used for stainless steel, titanium and nickel alloy tube to tube sheet welding
- Small, light and simple operation
- Uses localized guide for self-centering with optional spring balancer
- Expandable centering mandrel designed for precise positioning
- Enhanced water cooling system and high duty cycle for durability
- Recommended power unit = OW-ARC 180, 250 or 400

TSWH-1.5	
Diameter Range mm (inches)	16-38mm (.63"-1.5")
Rotation Speed (rpm)	0.6 - 12rpm
Weight kg (lbs)	3.5kg (8lbs)
Cooling	Water
Protective Gas	Ar / Mixed Gases
Standard Cable Length	L=12m (40")
Joint Type	Flush
Tungsten Diameter	2.4mm (3/32"")
Welding Degree	O°- 7°
Duty Cycle	100A at 70%
Dimensions (mm)	310 x 80 x 165mm (12" x 3.15" x 6.5")

TSWH-1.25 (Tube to Tube Sheet Weld Head)

The TSWH-1.25 tube to tube sheet weld head is designed for TIG welding small tube to tube sheet, suitable for carbon and stainless steel. It can also be used for recessed, projected and flush tubing, with or without wire feed. Can do .375" OD tube to 1.25" ID.

Note: This model weld head requires the use of the Manipulator.

For more information on the TPF-M manipulator see page 19.

PERFORMANCE

- High precision with fast and accurate performance, suitable for small heat exchanger
- Auto AVC control with on and off function for manual adjustments
- Water cooled TIG weld head, easy to change or adjust Tungsten
- · No twist wire and special wire feeding design for accurate/repeatable single and multi pass welds
- Integrated wire feed for recessed, projected or flush tube ends
- ullet Uses localized guide for self-centering of welds 1"OD and under using TPF-M manipulator
- Expandable mandrels to be used with optional spring balancer for welds 1"OD or larger
- Buttons on handle for easy operation.
- Recommended power unit = OW-ARC 250 or 400

TSWH-1.25

Diameter Range mm (inches) 8-32mm (.375"-1.25") Rotation Speed (rpm) 0.37 - 7.39rpm Arc Adjusting Distance 18mm (0.71")

Weight 11kg (24 lbs) without cable

Standard Cable Length L=12m (40')
Tungsten Diameter 2.4mm (3/32"")
Max wire feeding speed 1800mm (5.8')

Wire Diameter 0.8, 0.9, 1.0 (0.030", 0.035", 0.040")

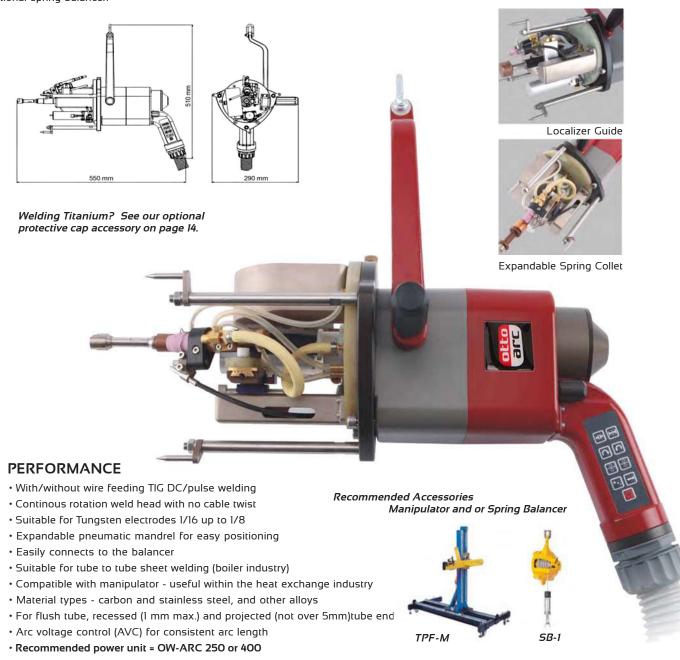

Cooling Water

 $\begin{array}{lll} \mbox{Cooling flow (ml/min)} & \geq 600 \ / \geq 1.26 \ \mbox{gal} \\ \mbox{Protective Gas} & \mbox{Ar / Mixed Gases} \\ \mbox{Duty Cycle} & 300A \ \mbox{at } 60\% \\ \end{array}$

Dimensions (mm) 550 x 290 x 510mm (21" x 11" x 20")

TSWH-3 (Tube to Tube Sheet Weld Head)

The TSWH-3 tube to tube sheet weld head is designed for TIG welding tube to tube sheet, suitable for carbon and stainless steel. It can also be used for recessed, projected and flush tubing with or without wire feed. We recommend for pipe with an OD of less than 1.25" with manipulator/balancer. For pipe with OD more than 1.25" the self centering mandrel is used with our optional spring balancer.

TSWH-3

Diameter Range mm (inches) 16-60mm expandable to 80mm (.630"-2.36" expandable to 3.15") Rotation Speed (rpm) 0.37 - 7.39rpm Arc Voltage Adjustment mm (inches) 20mm (.79") Welding Torch Angle 0°-30° Standard Cable Length L=5m (16') Welding Current/Duty Cycle 300A at 70% Protective Gas Ar / Mixed Gases Wire Feeding Speed mm/min (inches/min) 2200mm/min (86.6"/min)

TSWH-i-75 (Tube to Tube Sheet Weld Head)

The TSWH-i-75 tube to tube sheet weld head is designed for inner tube to tube sheet TIG welding and is suitable for carbon and stainless steel without wire feed.

PERFORMANCE

- · Commonly used on heat exchangers, inner tube to tube sheet welding
- · Minimum inner tube diameter of 19mm (.75 inches)
- Precise positioning and accurate/repeatability welding
- · Suitable for carbon and stainless steel
- · Can customize according to specific requirements
- Recommended power unit = OW-ARC 250 or 400

TSWH-i-75			
Tube OD	±19mm (.75")	Weight (excludes cable)	11kg (24lbs)
Depth for Inner Tube	20-120mm (.75"-4.75')	Cooling Flow	≥600ml
Tube Thickness	1-2.5mm (0.040"-0.1")	Cooling	Water
Connection	Tube insert, flush tube	Standard Cable Length	L=5m (16')
Rotation Speed (rpm)	0.37 - 7.39 rpm		

TSWH-i-1 (Tube to Tube Sheet Weld Head)

This welding head is also designed for inner tube to tube sheet TIG welding with integrated wire feeder.

2.4mm (0.095")

Weight (excludes cable) 12kg (26lbs) ≥600ml Cooling Flow Cooling Water Standard Cable Length L=5m (16')

TSWH-HB-625 (Headerbox Tube to Tube Sheet Weld Head)

This weld head is designed for deep hole tube to tube sheet TIG welding. It is suitable for carbon steel, stainless steel and most TIG type materials.

- Commonly used for special heat exchanger needs within the chemical industry (for example: air-cooled hydrogenation)
- Perfect for wire feed welds in hard to reach areas
- Narrow space welds reaching 4.75" to 8.5" (4.75" to 8.5" is the min. and max. distance between the two tube plates)
- Can customize according to specific requirements
- Torch angle negative 3 degrees
- Optional external or integrated wire feed available see page 22
- Recommended power unit = OW-ARC 250 or 400

TSWH-HB-625

HCW TIG NARROW GROOVE (IG/5G Hot or Cold Wire Welding System)

CUSTOM MANUFACTURED PRODUCT - CALL US WITH YOUR REQUIREMENT

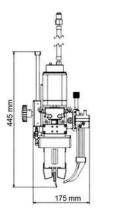

This system contains a swinging angle torch, protective gas hood, wire feeding frame, and optional camera monitoring system and electronic sliding function. The torch is made of high temperature resistant material and integrated water cooling system and protective gas channels. The inner protective gas hood is made of stainless steel. The torch design protects the external surface while performing the groove weld.

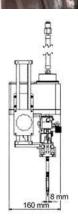

- Suitable for narrow bevel widths greater than 9mm (.375") and wall thickness greater than 30mm (1.25")
- Deposits heat efficiently, low heat input
- · Various welding methods: horizontal, vertical and orbital welding
- Five water cooling channels, high duty cycle
- · Double gas protection ensures greater weld quaility
- Suitable for carbon/stainless steel, nickel base alloys and titaniun
- Recommended power unit = OW-ARC 400, 401 and 600

Can be configured per customer requirement.

ACCESSORIES (For Otto Arc Systems Orbital Welding Products)

SPRING BALANCER

The spring balancer is specially designed for tube to tube weld heads. It helps assist with controlling the weld head based on positioning by balance. This accessory helps make the process of locating the center of the tube quick and easy as well as keeping the weld head stable.

PERFORMANCE

- Convenient for moving
- · Adjustable weight loading range
- · For tube to tube sheet weld heads

SPRING BALANCER (SB-1)	
Loading (kg/lbs)	9-15kg (19-33lbs.)
Traverse (mm/inches)	2000mm (78".7)
Weight (kg/lbs)	3.8kg (8lbs.)

MANIPULATOR

The manipulator is also designed for tube to tube sheet welding. The manipulator allows the operation to be easy and convenient by controlling the position of the weld head by 3 moving axes and by using pneumatic locking. It also assists with locating the center of the tube and creates stability during the welding process.

PERFORMANCE

- Durable and stable steel construction
- · Linear track for each axis for smooth and reliable operation
- Three-axes pneumatic locking system
- Two fixed and flexible wheels, easy to move
- For tube to tube sheet weld heads
- Patented design

MANIPULATOR (TPF-M)		
	Milimeters	Inches

AFTERMARKET WELD HEADS / PRINTER PAPER / OTHER

Otto Arc aftermarket orbital welding collets for Arc Machine weld heads are made to the highest quality standards. All our collets are made from stainless steel to give you better wear versus aluminum type collets. Our new spring designed collet will hold oversized and undersized tubing. Our new spring collets have more flexibility to hold all types of tubing or pipe. Our 500 heads now offer gate screws with springs to hold the latch up to make closing the upper gate easier. Our one-piece construction on the lower head will give you better alignment on both sides of your tubing.

you better alignment on both sides of your tubing.

500-SCREW 750-SCREW

PBM-2500 • 1" to 2.5" PIPE (ID Mount / Air or Electric)

WITH OPTIONAL SIZE RANGE OF 0.5" TO 2.5"

The PBM-2500 beveling and facing machine is light weight, just 13 lbs. and is designed to bevel boiler tubes. Our heavy duty tool bits are held in by our wedge lock system.

The torque accepting mandrel with lock in blades (no springs) easily stops any pieces from dropping down into the boiler tube. Our gear drive unit has spiral bevel gears for better torque (more teeth engagement, compared to standard straight gears that other competitors use).

TB-1123

PBM-2500 Electric Motor

PBM-2500 Machine Kit Includes: Machine, Tool Bits (2), Tooling, Manual and Case

PBM-2500 Kit with Electric 110v Motor	P/N: PBM-2500-10-E

PBM-2500 Kit with Air Motor	P/N: PBM-2500-10

PERFORMANCE

- Size range for Pipe 1" to 2.5" (12.7 mm 63.5 mm)
- Max wall thickness to 0.50"
- Air Power requirements: 40 cfm at 90 psi.
- · Lock in mandrel blades (no springs to lose) Adjustable keyway on machine and mandrel (eliminates backlash and chatter)
- .75 hp pneumatic motor
- 13 lbs. approximate working weight Hardened mandrel 55 Rc. (less chance of gouging with metal chips)
- Tool bit is held in by our wedge lock system (keeps the tool bit locked in the cutter head to ensure chatter free bevels)
- · Single mandrel with mandrel blades to cover size ranges

QUICK CUT SAW (.75" to 4.5" OD)

QUICK, EASY AND CONSISTENT! GREAT SOLUTION TO CUTTING TUBE & PIPE!

Designed to perform true and burr free cuts with our specially designed vice that creates a self-centering hold for the finest cuts. Ideal for high-purity applications!

Our Otto Arc "Quick Cut Saw" is designed for fabrication facilities and for projects that require beveling or squaring for pre-prep welding of pipes and tubes.

- Will cut tubing from .75" to 4.5"
- Will cut piping from .5" to 4"
- Will cut square to .005"
- · Steady rest for accurate cutting
- Enclosed gear box (does not require expensive oil)
- Enclosed bearings for smooth operation
- · Designed to keep out chips during operation
- Simple to adjust sizes and depth
- · Performs bevels and squaring
- · Ideal for high-purity applications
- Can also cut plastic, aluminum and a variety of other alloys
- Electric motor: variable speed control 110v or 220v

TSM-1000 • 1/8" to 1" TUBE (OD Mount / Battery Powered)

FEATURES - PORTABLE!

TSM-1000 is one of the smallest designed facing tools on the market today. The machine is powered by an air cooled 18V-Li Metabo battery motor and the total working weight of the machine is 6 lbs. The design of this machine makes it easy to use on job sites, making hard-to-reach areas easily accessible due to it's small size.

It has a battery powered motor, which will last for 2+ hours, with a 15 min. recharge. Collets are made from Stainless Steel material and are self-locking into the cutter to hold the collets in place.

TSM-1000 Machine Kit Includes: Machine, Tool Bits (2), Tooling, Manual and Case

TSM-I000 Kit with Variable Battery Powered Motor P/N: TSM-I000-I0-BP
TSM-I500 Kit with Variable Battery Powered Motor (230v) P/N: TSM-I000-I0-BP-230

PERFORMANCE

- Size range 1/8" to 1" Tube (3.175 mm 25.4 mm)
- 18V Metabo air cooled Li powered battery motor
- Easy replacement of collets and size ranges
- Uses Stainless Steel collet set (upper / lower)
- 6 lbs. (2.6 kg) approximate working weight
- Faces most metals and plastics, including high nickel materials
- Battery charger: 110V;60Hz US Style / 220V;50Hz CE Compliant
- Tool bits are designed to work on the following materials: stainless steel, inconel, hastelloy, carbon steels, aluminum and other alloys
- · Options: additional batteries can be purchased

TSM-1501M • 1/8" to 1" TUBE (OD Mount / Electric)

Our new micro facing machine was designed to face 1/8" to 1" tubing. We also offer two collets: our standard collets for facing micro fitting or short tubing from .20" long and our extended collets for 1" and above.

This new machine will let you face quickly and squarely every time. You will also find this machine has an unobstructed view of the tool bit and tubing. Stainless collets will not damage your electro-polish tubing. Our feed indicator will give you precise lengths every time.

TB-1506 Tool Bit

TSM-1501M Collet

TSM-1501M Machine Kit Includes: Machine, Tool Bits (2), Tooling, Manual and Case

TSM-I50IM Kit with Variable IIOv Motor P/N: TSM-I50IM-IO
TSM-I50IM Kit with Variable 230v Motor P/N: TSM-I50IM-I0-230
TSM-I50IM Kit with Variable Battery Powered Motor (IIOV) P/N: TSM-I50IM-I0-BP
TSM-I50IM Kit with Variable Battery Powered Motor (230v) P/N: TSM-I50IM-I0-BP-230
TSM I50IM with 230volt motor, VTC TSM-I50IM-I0-230-VTC (variable speed motor)

Note: Bench Mount Option Available P/N: TSM-253

PERFORMANCE

- Size range 1/8" to 1" Tube (3.175mm- 25.4 mm)
- Standard 110/220V variable speed motor
- · Easy replacement of collets
- 9 lbs. approximate working weight
- · Adjustable measurement indicator
- Large view port for easy bit replacement
- Faces most metals and plastics, including high nickel and carbon steel materials
- Options: bench mount kit or battery powered motor

TOOL BITS FOR TSM-1501M

* TB-0169	Facing Bit (.75" Tall)
TB-0167	37.5 degree bevel
TB-0202	Extended reach standard facing style (1"Tall)
TB-0202-TIN	Extended reach laser coated (I" Tall)
TB-0204	Heavy duty for larger wall thickness (.75" Tall)
* TB-1506	For use on 316 or 304 stainless steel (.75" Tall)
* TB-1506-TIN	Laser coated for abrasion resistance
TB-1510	Double sided tool insert (carbide)
* TB-4000	Facing Bit (.625" Tall)
TB-5000	For soft and gummy SS tubing (.75" Tall)
TSM-AD-1500	Tool bit adapter/holder for inserts

- * Tool bits included in kit
- ** Not recommended for electropolished tube

TSM-2500M • 1/2" to 2.5" TUBE (OD Mount / Electric)

FEATURES - HOLDS 3 TOOL BITS! FACES, BEVELS AND COUNTERBORES!

This new facing tool will face tubing from 1/2" to 2.5" and is designed like our TSM-450IM, but lighter in weight, approximately 19 lbs. This tool was designed with our Pharmaceutical contractors in mind.

Our feed knob will give you the control you need to ensure precise lengths. This machine comes with a Metabo motor with speed control that will keep the RPM constant under load. This speed control will help extend the life of your tool bits.

As with all our "M" style machines, we offer three types of collets. Use "Standard" to face short tube fittings and use extended collet's for tubing 4" or longer. It comes with a standard variable speed motor, allowing you to set a constant operating speed.

TSM-4501M • 1" to 4.5" TUBE (OD Mount / Electric)

FEATURES - HOLDS 3 TOOL BITS. FACES, BEVELS AND COUNTERBORES!

This lightweight 25lb. facing machine has a wide working range of 1" to 4-1/2" OD. Our facing tool offers floating collets that let you grip oversize or out-ofround tubing.

As with all our "M" style machines, we offer three types of collets. Use "Standard" to face short tube fittings and use extended collet's for tubing 4" or longer. It comes with a standard variable speed motor, allowing you to set a constant operating speed.
